# Moveworks for HR
## The AI solution for personalized HR support

HR is responsible for the day-to-day employee experience. Everything from onboarding to healthcare enrollment falls under their purview. While the rise of the hybrid workplace has provided unprecedented flexibility for employees, this flexibility has put even more pressure on HR teams. They recognize that slow support directly correlates with employee frustration, but they are overwhelmed, struggling to provide support with the speed and personalization that employees deserve.

Moveworks for HR tackles this challenge, providing a one-stop shop for employees to get their HR issues addressed. Employees receive world-class support in seconds, and HR teams get time back to focus on what matters most — people, not support queues.
### Provide Instant Support
Moveworks resolves issues end-to-end by pulling personalized answers from disparate sources and surfacing relevant forms.

### Accelerate Complex Issues
Moveworks automatically routes issues to the right specialist or manager for approvals.

### Deeply Integrate HR Systems
Moveworks unifies existing HR systems to provide the best up-to-date answer or action. No need to remember multiple systems or manually update dialog flows.

Hi Doug 👋
Your new hire, **@Gianna**, just finished her first month!
👉 Please complete our New Hire Form to send her some celebratory swag!

**Doug** 11:27 AM
Ah — yes! Send the swag!

**Doug** 11:29 AM
I already reviewed her first timesheet. Can you mark it as approved right now?

**Moveworks** 11:29 AM
**@Gianna's** payroll has been approved in Workday. Click here for a **Time Period Summary**.

**Doug** 11:29 AM
